# Abstract Template for Data Literacy 2023/24
# Replace this with your Project Title

**Firstname1 Lastname1** [* 1]   **Firstname2 Lastname2** [* 2]   **Firstname3 Lastname3** [* 3]   **Firstname4 Lastname4** [* 4]

## Abstract

Put your abstract here. Mention, in two sentences, what you are planning to work on. Then, mention which dataset you are planning to use. Include a link to the dataset you are planning to use (If you are planning to collect your own data, explain how you are going to do so). If possible, mention (one sentence) how you came across this dataset, or why you decided to do this. Explain what kind of analysis you are planning. Finally, declare which results your are expecting to achieve. Your entire abstract should be at most 20 lines long.

We will use mostly this same template for the project report, potentially with some minor updates.

## 1. Contribution Plan

Explain here, in one sentence per person, what each group member is going to contribute. For example, you could write: Max Mustermann is going to collect and prepare data. Gabi Musterfrau and John Doe will run the data analysis. Jane Doe is responsible for visualizations. All authors will jointly write the text of the report. Note that you, as a group, a collectively responsible for the report. Your contributions should be roughly equal in amount and difficulty.
